## PROJECTS

### Academic Projects:

#### **1. E-authentication system using QR code and OTP**

- E-Authentication system revolutionizes web site login and authentication. It eliminates many problems inherent in traditional login techniques
- It is more secure as it involves AES encryption technique and it is easy to use, also gives freedom from remembering so many username and different websites.

#### **2. Online car rental system**

- Online car rental system aims to reduce the difficulty of storing data in a rental service office and avoiding the manual book working method
- At present many of the offices keep their data in a log or register book. This makes a lack of security and also much difficult to maintain.
